

PERFECT PUMP VALVES

Introduced to the market in 2012 by Rob Pond Ltd, the Perfect Pump Valves are the highest-quality pump valves on the market.

Designed to combat the problem of leaking and/or seized pump valves, the handles ensure the valves will always be operable. With full-bore, ball-type design, the valves ensure other system components are not affected by restricted flow-rates.

The side flats are designed to make installation easy, and each pair is supplied with a rubber washer that will not perish like fibre washers.

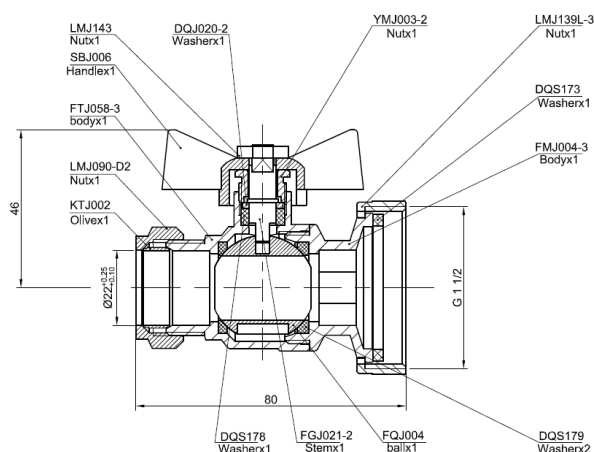

Specifications:

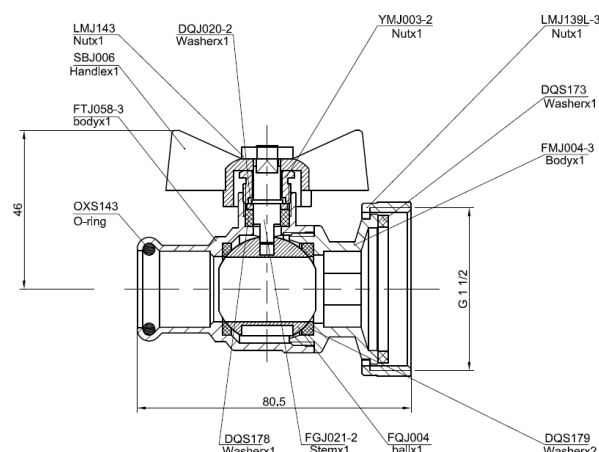

Code	PPV22	PPV22-PF	PPV28	LPV35
Variant	22mm pair	22mm pair	22mm pair	22mm pair
Connection 1	22mm Compression	22mm M-Profile Press	28mm Compression	35mm Compression
Connection 2	1" 1/2 F swivel	1" 1/2 F swivel	1" 1/2 F swivel	1" 1/2 F swivel
Material(s)	HPb58-2A	HPb58-2A	HPb58-2A	HPb58-2A
Maximum pressure	16 Bar	16 Bar	16 Bar	16 Bar
Maximum temperature	80°C	80°C	80°C	80°C
Operating pressure	8 Bar	8 Bar	8 Bar	8 Bar
Packaged weight	700g	695g	1,144g	1,755g
